

**BSc Computer science programme**

Course name: Agile Software Projects

Tutor group number: tutor group 02

Team number: Team 17

Team meeting date: 07 June 2021

Team members present: Marlene, Zakiyyah, Alexeia Wiesner, Shujun (SJ), Felix

Team members absent: James

Agenda item/Time	Description	Discussion	Action Points
Updates	Discuss updates from last meeting	Each person shares what they've worked on since our last meeting	
Marlene	Mockup and prototyping	Marlene shared the mockup and got feedback from the group	Do some user testing on the prototype
Alexeia	Surveys and feedback	Alexeia shared the feedback from the survey. We currently have 15 responses from	Share responses with the rest of the group so we can incorporate it in the next version of our mockup

		people we shared with. Really great feedback from people, on what they would like to see in an app like this.	
Zakiyyah	Database Schema for the web application	Zakiyyah shared a database schema we can use for the web application. She explained how she came up with the structure and that she will develop an ER diagram. We will use MySQL for our database	create an ER diagram to share with the group for the database. Zakiyyah to do research about a UML diagram and technical and functional specs.
Shujun	Project Background	SJ did some research for the project rationale and justification, also the motivation behind it. She shared a bit about how social media has encouraged people to collaborate and shared some knowledge from some research papers. SJ also created a self-ethnography	have all group members answer questions for the self-ethnography study. Use the user centered design strategy to define our aims and objectives. Add the initial aims and objectives by the next meeting. Also ask team members to add answers for the self study this week

		study to develop a better user centered designed study	
Felix	SWOT analysis	Felix created a SWOT analysis for us to examine the strengths, weaknesses, opportunities and threats in regards to the project. We have some ideas about what we can add to the project long term as well. Also shared some ideas about low-fidelity prototypes and how to do user testing for this.	Discuss user testing with Marlene

**Previous meeting action points:**

Alexeia: Research and setup heroku, setup skeleton app with basic CRUD (Create, read, update, delete). Look for a post in Database Networks and Web that explains basic setup on heroku. Do midterm parts assigned to me.

Zakiyyah - Formal Specifications - Database schemas and specifications

Marlene: Create a draft mockup of the app and a clearer outline of the features. Start writing out background, aims and objectives

**Meeting notes:**
