

BSc Computer science programme

x`Course name: Agile Software Projects

Tutor group number: tutor group 02

Team number: Team 17

Team meeting date: 31 May 2021

Team members present: Marlene, James, Zakiyyah, Alexeia Wiesner , Felix, Shujun

Team members absent:

Agenda item/Time	Description	Discussion	Action Points
Features	Discuss the general outline and features of the project	Marlene shared about the main features of the project. Questions and discussion held around implementation. You can find the link to this here .	-Marlene create a Mockup of the site -Alexeia to create MySQL Database instance created on Heroku
Midterm report structure	Go through mid-term requirements	Zakiyyah walked us through the specific requirements and we signed up for specific tasks. The notes for this can be seen here	Action items can be found here .

Survey questions	Discuss Survey questions	Alexeia shared about the survey questions he has already created. The survey can be found here .	We are refining the survey questions and Alexeia will be sending out the survey on Thursday on the Slack channel and will share with other software developers.
Product research	Discuss the product research	James shared the initial product research he has done on the product here . There were some suggestions on other products that were similar in the market that we could research these include W3Schools and 30secondsofcode	James will add more information to the documentation and research and also look into the other suggested products
Research on interaction designs of the system	Discuss the research on design systems we will use for the product	Shujun shared about the market and product research that she has done and how we can plan to implement more user centered design.	<ul style="list-style-type: none">-Interview session for a formative document find out more-User Centered design guidelines

evaluation techniques	Discuss how heuristics evaluation reports.	Felix shared the heuristic evaluation report he created and how we can evaluate the product once we have an initial prototype	Once the mockup is done, Felix will collaborate with Marlene on evaluation.
-----------------------	--	---	---

Previous meeting action points:

- Marlene: Features
- Alexeia: Survey questions
- Zakiyyah: Midterm report structure and breakdown so we can clearly know what to do
- James: other user research product research
- Shujun: Research on interaction designs of the system
(A description of your approach that discusses the motivations and reasoning for working in a particular manner (e.g. Agile, User-Centred Design, Test-Driven Development.))
- Felix: evaluation techniques

Meeting notes:

meeting action points:

BSc Computer science programme

Alexeia: Research and setup heroku, setup skeleton app with basic CRUD (Create, read, update, delete). Look for a post in Database Networks and Web that explains basic setup on heroku.

Zakiyyah - Formal Specifications - Database schemas and specifications

Marlene: Create a draft mockup of the app and a clearer outline of the features. Start writing out background, aims and objectives
