Evaluation (Think aloud) Report
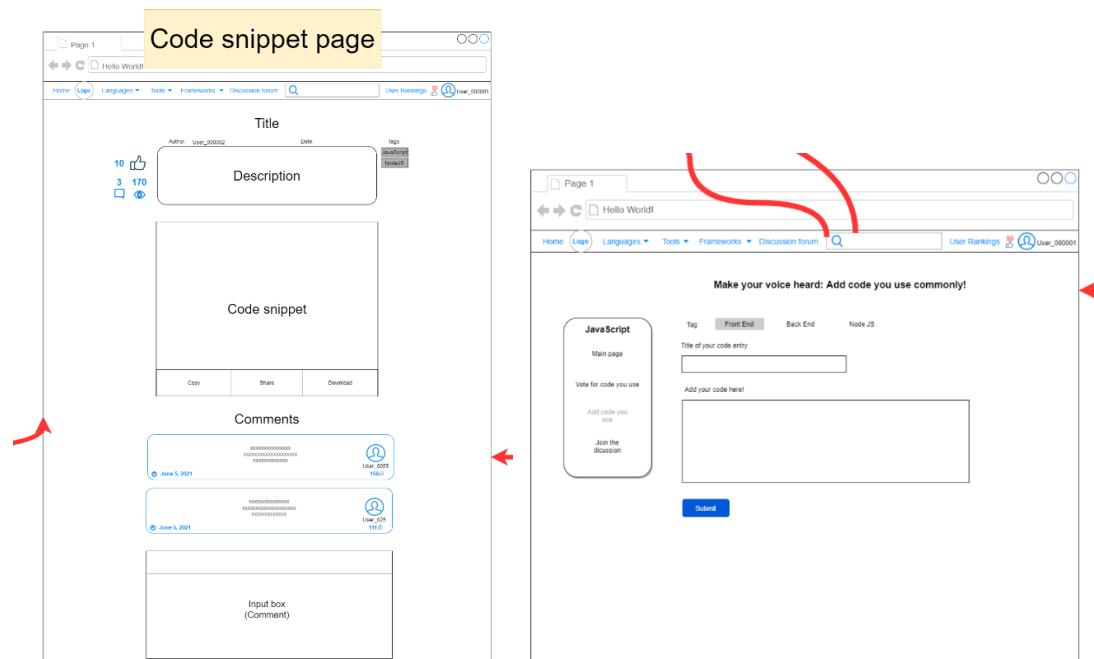

Product: The most common web app
Version: Version 2
Number of test users: 2
Problem:

All tasks completed successfully. However, there are user feedback code upload pages that only have a simple upload function. Compared with "code snippet page", "upload page" has no place to fill in code description.

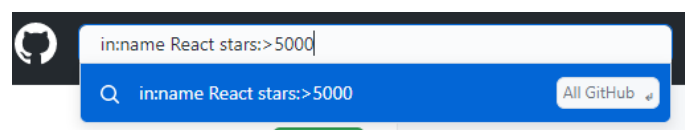

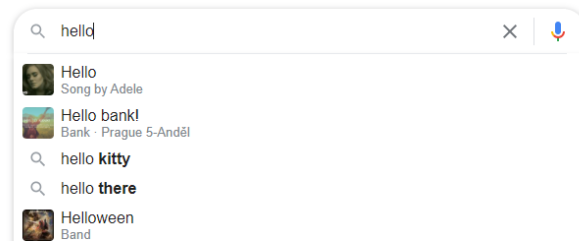

Features that attract users:
1. The code snippet page.
2. The voting page.
3. The layout is simple and clear.
4. Ability to discuss code snippets with others.

User suggestion:
1. Improve upload function.
2. Improve the function of the search bar --- Search with modifiers

3. Improve the function of the search bar --- Search with keyword prediction

The average attractiveness:

A total of two users participated in this evaluation, with an average score of 4 (total score of 5).
